

"Why is education important?"

Dear fellow people Education is important because education helps you go to high school and allows you go to college. Education not only gives us the opportunity to learn new things, but also it allows us to get a good job and therefor live a better life. By going to college, we learn about life we learn about science math and other subjects that are essential to succeed in life.

I believe education gives us a great knowledge of the world around us. For example in social studies we learn about people of the past such as Australopithecus afarensis which explains the way of living of our ancestors and the development of first humans being in the world. Education also gives the knowledge and the ability to interpret the world around us making people capable of thinking about the right things and to make good decisions for our future.

Additionally education is important because it shows us the pathway to make our dreams come true. For example it opens doors for us to pursue our dream career. If we get an education this means we can get a better job and do what we like to do.

In conclusion getting a education is important because it gives us opportunity to succeed in life, to gain knowledge about the world around us. Succeeding in life not only means getting a good job and making money, but also understanding the society we live in. This means making the right decisions and getting along with people around us.
