The Road to success

Ethics, personality, love, pride and your self-esteem knowledge gained converted into wealth that can not be stolen away from you. John Dewey once said, "Education is a social process. Education is growth. Education is, not a preparation for life; education is life itself." I believe that this American philosopher was correct; education is such an important key in our life. Education provides the knowledge, stimulates innovation, and raises income. As humans, our number one priority should be to try all the best that we can, to live successfully on and make a better society in the world we live in.

Education gives us a lesson in life, lessons that could change the way we once viewed the world. It develops in us a perception of looking at life. It helps us assemble opinions and have points of view on everything in life. After all, education prepares us to have a tolerant mind towards other peoples' opinions. Although some of the minds stay unaffected, someone's opinion may have a significant impact in your life and make you develop new ideas or innovations. Nevertheless, knowledge and education helps us maintain learning in life that is limitless and dispels ignorance.

Despite this, education makes you an interesting person. Education is found everywhere not just in your school, you can learn it at home with your relatives, news, magazines, etc; education is found everywhere. Education helps you understand how society works, how you are supposed to behave and how to help your community out. By getting education you will make a better community and with a better community you

will make a safer neighborhood. Just imagine a better neighborhood that will increase the trust towards each other.

Family problems mainly involve the amount of income your family has. Lack of education and money impacts your life and your family. By having all the instructions on how to manage money and invest it wisely, decreases the risk of getting bankrupt, less argument between families, more happiness and love. On the other hand, one of the reasons why education is so important is to make hiring people easier and more suitable. Many of today's employers are valued on a college degree or college education above anything else. Hence, education has become both a barrier and advantage to landing great careers and ultimately succeeding in life.

Finally, we know that education is essential and can help us in many ways. We are the future generation! Human race depend on us, and we must depend on the future generation to come. Education is the foundation of culture and civilization. The root of this society, we want well educated people to run the government not the contradictory! In conclusion, education is the solution to the future and prosperity in our lives.
