

Best Practices for Fellowship Events

Phi Sigma Pi is based upon a “tripod of ideals,” Scholarship, Leadership and Fellowship, each of which we value equally. We use these ideals to enhance our skills, improve our campus and serve our community.

As our Members learn and serve together, meaningful connections form and develop our Fellowship within the Fraternity. Because we are a National organization, the connections you make will extend far beyond your Chapter, your campus or your city. Here are some ways to ensure successful Fellowship events that increase Chapter morale and strengthen bonds:

1 Get Member Input

The most successful events appeal to a wide array of Members with varying personalities and interests. You can ensure strong attendance by gathering information from Members about what activities they would most like to do with fellow Members. This will be different for every Chapter, and utilizing Interest Surveys at the end of the term will help get ideas for next term's events.

2 Get Away from Campus

Sometimes you just need to get off campus for some Brotherhood bonding time. Check out a movie, attend a sporting event or visit a local museum. When transportation isn't an issue, it can be fun to be out and about with your fellow Members.

3 Make it Interactive

No matter what you decide to do, make the most of your time together as a Chapter. Give Members a chance to bond over trying something new.

On-Campus Fellowship

Even when you're not able to go off campus, Fellowship can be a lot of fun. Be creative about getting to know one another right where you learn every day. The important part is spending time with your fellow Members, and it is a great opportunity to wear your letters!

Here are some ideas for building Fellowship while on campus:

- Cheer on the home team at a sporting event
- Attend an on-campus movie night-- and don't forget the popcorn!
- Enjoy dinner together with a Chapter potluck
- Participate in a school-sponsored concert or festival
- Show your crafty side by creating something as a group
